1. Introduction

The purpose of CID Book 3 (Terminal Description) is to give information about the assigned terminals along the RFC Rhine - Alpine. In article 2.2.c of the Regulation (EU) No 913/2010 of the European Parliament and of the Council of 22 September 2010 concerning a European rail network for competitive freight, terminals are defined as follows:

“Terminal’ means the installation provided along the freight corridor which has been specially arranged to allow either the loading and/or the unloading of goods onto/from freight trains, and the integration of rail freight services of road, maritime, river and air services, and either the forming or modification of the composition of freight trains; and where necessary performing border procedures at borders with European third countries.”

The following list of terminals on Rail Freight Corridor Rhine-Alpine is sorted by country from North to South. The list represents the state of play in January 2019.
